

The Conexiones (Connections) Program offers the Latinos In Technology Scholarship recipients an opportunity to partner with a Latinx professional in Silicon Valley. In partnership with local Hi-Tech Latinx Employee Resource Groups, this five-month program will focus on leadership and professional development skills.

A mentor will meet once a month for one hour to provide guidance, motivation, emotional support, and role modeling.

A mentor may also help with exploring careers, setting goals, developing contacts, and identifying resources in hi-tech careers. Each session will address professional skills such as resume building, interview questions, improving social media and LinkedIn profiles, and an introduction to a professional in the scholar's field.

REGISTRATION FORM

Fill out the volunteer registration form.

HFSV will match you with a scholar with similar interests.
